- Systems & DevOps: Linux, Windows, LAN Networks, Docker.
- Security: Secure Software Development, Network Security Fundamentals.
- Tools & Methodologies: Git, GitHub, Agile / Scrum.

Bryan Ruzafa Gonçalves

Full-Stack Web Developer - Student

PROFESSIONAL PROFILE

Associate Degree in Web Applications Development (DAW) and Systems & Networks Technician (SMR), currently pursuing a Specialization Course in Cybersecurity. Hybrid technical profile focused on secure software development and information security.

In software development, I build structured and scalable web applications centered on NestJS, MySQL, TailwindCSS, and containerized environments with Docker. Backed by hands-on experience in enterprise IT support, local area network (LAN) administration, ticketing systems, and workstation provisioning. Proactive and analytical mindset, committed to delivering robust solutions and applying cybersecurity best practices within development and systems teams.

WORK EXPERIENCE

TECHNICAL SALES REPRESENTATIVE – Electrónica Mirambell
May 2025 – May 2026

- Technical and commercial advisory for electronic and consumer technology products.
- Point of sale (POS) and cash flow management.
